

## CITY AFFAIRS.

ADVERTISERS will take notice that we cannot engage that any advertisement sent to THE NEWS office at a later hour than half past nine o'clock at night will appear in the next morning's paper. An exception to this rule is made in favor of notices of meetings, deaths and funerals.

## Meetings This Day.

St. Andrew's Lodge, at 8 P. M.  
Phoenix Fire Company, at 8 P. M.  
Hook and Ladder, No. 2, at 8 P. M.

**ACCIDENTALLY SHOT.**—Saturday night, at No. 52 Queen street, a colored woman, named Flora Davis, was severely wounded by a ball from a pistol, which fell to the floor from the pocket of Sikes Thorne, colored, and was discharged by the shock. As we learn, the ball entered the woman's thigh, ranged upward a short distance, passed out and penetrated her abdomen, where it now is. The wound, though severe, is not considered dangerous.

**MORE OF THE CITY PROPERTY LEVIED UPON.**—In our advertising columns will be found an advertisement from Sheriff Mackey, announcing that by virtue of an execution in the case of the executors of George Gibbon vs. the City Council, he will sell at the Courthouse corner, on the first day of next month, all the right, title and interest of the defendants in the following property of the City Council of Charleston, or as much thereof as may be necessary to satisfy the execution: Six thousand eight hundred shares, original stock, of the Northeastern Railroad; five thousand nine hundred and fifty shares of Memphis and Charleston (dividend) stock; two thousand shares, original stock, of Cheraw and Darlington Railroad; \$3391.50 certificates of indebtedness of the Northeastern Railroad; \$26,000 eight per cent. bonds of the Northeastern Railroad.

The value of the property thus levied is far in excess of the amount of the execution.

**CHURCHES.**—The resignation of Judge Carpenter was received by Governor Scott on Saturday.

The exterior of the Mills House is receiving a new coat of paint.

Mr. Wm. F. Withers won the double case silver watch raffled Friday night.

Daddy Cain is very severe on Bowen and his friends, who took control of the anti-Bowenite meeting at Liberty Hall Wednesday night.

L. Bunch, who was removed from the office of magistrate of this county, has been appointed a trial justice.

Diedrich Suchenbury was before Trial Justice Caulfield, Saturday morning, on the charge of beating his wife, and was fined \$2.

The hearing of the case of Eugenia Bowers and Emma Hamilton, arrested for keeping a disorderly house in Elliott street, has been deferred until day.

Jerry Wright alias Smith, colored, is held for trial upon the charge of stealing a copper pump from Mr. Hogan's premises on Coming street.

J. C. Brown, Isaac Smith and Elias Adams were fined \$5 and costs each by Justice Caulfield, on Saturday, for having beaten James Laddan at a ball.

C. Micheals had a hearing, Saturday, on the complaint of selling soda water without a license, and was fined \$5, and in addition thereto had to pay \$10 for a license.

G. Gallard, arraigned before Trial Justice Caulfield for beating Jacob Golings, was sentenced to pay a fine of \$2 and costs, or remain ten days in jail.

Mr. B. W. Warren, who resides at the corner of St. Philip and Warren streets, was fined \$20 Saturday by the Mayor for neglecting to have his chimney swept—it having caught fire the day before.

Edward Corcoran, Boston Jenkins, Jacob Butler and Wm. Maxwell, colored, who are supposed to be members of a gang of thieves who infest our docks, whence they sally out at night to steal and plunder on land and water, have been arrested by the detectives and committed to jail.

**MAKING ICE.**—It seems that an ice-making machine for this city is in course of construction at Norwalk, Conn. The Norwalk Gazette says:

"The Vacuum Pump constructed by the Norwalk Iron Works for making ice with the machine invented by Mr. D. L. Holden, of New Orleans, has, after several trials, proved itself equal to the work. As the process may be interesting to our readers, and may serve to show that the artificial equals, if not surpasses, the natural ice, we give a description of the same. The machine is operated on the chemical principle, that liquids passing into vapor absorb heat. Necessity first is to find a liquid which shall itself give off its vapor at low temperature. This material has been found and can be abundantly obtained, being a liquid formed by fixing the lightest vapor which is thrown off from petroleum in refining, either by pressure or with a freezing mixture, around the condensing coil. This liquid boils or gives off its vapor at 48 deg. Fahrenheit, under the ordinary atmospheric pressure, and removing the gas, it boils at a still lower temperature, proportioned to the amount of atmospheric pressure removed. The liquid is placed in rectangular vessels, perfectly air tight, and strong enough to stand a vacuum without collapse. To these vessels a pump is attached, the vapor drawn off as fast as it comes from the liquid, and this action of passing from liquid to vapor absorbs the heat of a non-congealable bath in which the vessels are placed. Into this non-congealable bath there are placed moulds containing fresh water, the heat of which is absorbed by the bath, and, after freezing are removed and the ice therein thawed out by immersion in water of ordinary temperature. These moulds form ice two inches thick, which by simple superposition adhere to each other, making blocks of ice of any desired thickness or weight. As the liquid used possesses the property of absorbing heat at such low temperatures it has been called 'chymogen' or the 'breeder of winter,' and being contained necessarily in vessels perfectly airtight, it is impossible that any impurities should affect the water to be frozen. As this water is the same which persons are accustomed ordinarily to use for drinking purposes, it is even better than the natural ice, which is taken from ponds in northern, and in melting, mixed with water of southern latitudes. The pump we allude to is for manufacturing ice in Charleston, S. C., and the party for whom it was specially constructed hopes are long to be furnishing a pure and cheap ice to the population of that city. En passant we may say that it is claimed that in New Orleans this commodity is cheaper this year by forty per cent. than in New York City, which, owing to the difference of isothermal lines, seems rather remarkable, but is easily accounted for by the statement that the ice sold there is the product of machinery. In addition to the vacuum work, the pump also compresses the gas and causes it to liquify, so that of the 'chymogen' used none is wasted or destroyed.

Since the above was put in type our Columbia correspondent informs us that Mr. J. C. Seeger, of Columbia, has received an ice machine manufactured in Europe at a cost of \$6000.

**DEATH OF JUDGE LONGSTREET.**—The venerable and distinguished Judge A. B. Longstreet died at Oxford, Miss., on Saturday, in the 80th year of his age. Judge Longstreet was a man of varied talents and mental accomplishments. He was eminent as a jurist, an able and effective advocate, an eloquent divine, and one of the most successful writers of humorous fiction that the South has produced. For many years he has lived retired from public pursuits, and devoted his time exclusively to the education of youth in the Mississippi University, of which he was president, we believe, up to the time of his death. His "Georgia Scenes" put the whole world to laughing when it appeared, some thirty-five years ago, and he has left several graver works to perpetuate his name and memory.

**PHOSPHATES.**—On Saturday, last Attorney-General Chamberlain and City Attorney Corbin, on the part of the State, made a motion before Judge Willard, at Columbia, for an injunction to perpetually restrain Charles and Francis Deighnan, and eight others, owners or captains of vessels, from intruding upon the rights and property of the State, by digging, mining and removing from the bed of the Stono River, a navigable stream, the phosphate rock and phosphatic deposits, making this motion, as we learn, on the ground that the State owned all of the phosphates and phosphatic deposits in the navigable waters and streams of the State, and arguing that the Supreme Court had, in a question whether the title to the soil under the navigable waters of Mobile Bay was in the United States or in the State of Alabama, decided that the shores of the navigable waters, and the soils along them, were not granted by the constitution to the United States, but were reserved to each of the States respectively; that the "act to grant certain persons therein named, and their associates, the right to dig and mine in the beds of the navigable streams and waters of the State of South Carolina for phosphate rock and phosphatic deposits," passed March 1, 1870, asserted the right of the State to the soil in the beds of the navigable streams and waters of the State; "that by this act the State, in effect and in terms, sold the phosphate rock and the phosphatic deposits in the beds of navigable streams for one dollar per ton, the parties (Deighnan and others) did not remove the phosphates by the authority of the State, or any other authority, and as the royalty could not be collected from them, and certainly not from the grantees, whatever number of tons of phosphates were removed by them was an irreparable loss of so many dollars to the State.

Messrs. Tennent and Miles represented Messrs. C. & F. Deighnan and others, and moved a postponement of the case on the ground that they were not ready to enter upon a discussion of its merits; but the Judge having ruled that the arguments should be proceeded with, they admitted that the property was owned by the State, but that it was held by the State like it held the rivers and navigable streams, in trust for the use of the public, and not for private gain.

After these arguments, the Judge announced that he would reserve his decision.

**TROUBLES IN THE RADICAL CAMP.**—Some of the old SENTINELS RELIEVED FROM DUTY—SCOTT AND CARDOZO EXPECTED TO HEAL THE BREACH.

During the past week or two there has been an unusual degree of excitement among the Radicals of Charleston, occasioned by the friends and opponents of Congressman Bowen attempting to control the various political meetings. At nearly all of the various ward meetings held last Tuesday night to elect delegates to the county convention, there was great confusion, or, stated generally by the friends of Bowen, who were in the minority, attempting to control the meetings. It is charged by Mackeyites that Alderman E. P. Wall brought men from the marl works to Ward 7, held a meeting out of doors, and elected delegates to the county convention; also, that a friend of Bowen was detected while attempting to cast three votes at once, and that another friend voted in a ward of which he was not a resident, &c. It is known that a meeting, called by the opponents of Bowen with a view of showing up his political career, was controlled by Bowen and his friends who came, and by hootings and howlings prevented any one from speaking.

All of these things have tended to disgust the opponents of Bowen, and their leaders—DeLarge, Cain and T. J. Mackey—having the ear of Scott, who is himself not friendly with Bowen, have determined to exert their influence to remove from their path the friends of Bowen, by taking from them whatever of power or influence they have by virtue of office to which they were appointed by Governor Scott. The result of this determination is shown by the removal of G. B. Stoddard (harbormaster) from the position of political commissioner of this port. It is also reported, with what justice we know not, that Trial Justice Mishaw, (who does not work with the Mackeyites,) has been or will be relieved from office.

As matters now stand, there is considerable disaffection among the Radicals, some of whom, led by DeLarge, Cain, Delaney and others, are in favor of a majority of colored men being put in office, and others are opposed to the movement, the largest number of whom are the white men who hold offices, and their supporters. So great is this disaffection that, as we are informed, it has been deemed necessary that Governor Scott and Secretary of State Cardozo should come here and attempt to heal the breach. They are expected to reach the city this afternoon, and address the Radicals to-night.

**LATER.**—We learn that Justice Mishaw has not been removed, and that Gov. Scott has telegraphed that he will not be able to come to-day.

**Bill Heads printed on fine paper at \$3, \$4, \$5, \$6 and \$8 per thousand, according to size, at THE NEWS JOB OFFICE.**

**DOGS—A SENSIBLE ONE THAT WOULDN'T BE KILLED AND A MAD ONE THAT WAS KILLED.**—As is known the ordinance providing for the killing of all dogs "found going at large without city badges from the 15th of July to the 15th of September," went into force on Saturday, and about seventeen worthless curs by swallowing strychnine pills, saved their owners, if they had any, the necessity of expending money for city badges. One dog, however, was "too much" for the administrator of these delightful pills "warranted to cure all the ills that flesh is heir to." When the pill, covered with a delicious morsel of meat, was shown the dog he acted as if he were perfectly crazy to get at it. When it was thrown to him he snapped it up, then put it down, and after looking up at the man with an expression which said as plainly as looks could say, "do you see anything green here," fled from the spot.

Early Saturday morning, Officer Nipson shot a dog at the corner of Orange and Broad streets, which was believed to be mad. He foamed at the mouth, snapped at every passer-by, and finally in his rage bit at the iron railing until he broke his teeth.

**A NEW STEAMSHIP FOR THE CHARLESTON TRADE.**—The Philadelphia Ledger, of Friday, says:

Yesterday afternoon, about half-past 2 o'clock, an iron steamship, built by Mr. Thomas Clyde, of this city, by William Cramp & Son, was launched from their yard, foot of Palmer street, in the presence of a large number of spectators, male and female. About one hundred persons were on the vessel at the time of the launch, and as the steamer glided into the water, they were cheered by the spectators on shore and from the vessels in the stream.

The steamer was beautifully decorated with flags, giving it a gay appearance, and has been built with all the modern improvements, and is of great power and carrying capacity, estimated to carry 500 bales of cotton on ten and a half feet draught. The length is 225 feet, beam 37 feet, depth of hold 21 feet. The hull is double bottomed throughout, with angle iron reverse bars on every frame, and has an iron deck frame, and four water-tight bulkheads. The engines are being built at the principal factories in Kingston. This substantial iron steamship is claimed to be the most complete and well-appointed freight and passenger ship ever launched, and expressly adapted to the wants of the trade of Charleston, for which service, it is said, she is to be used. The launch was a success, the vessel sitting gracefully in the water, and meeting the full expectations of the builders. At the present time, there lays in the dock the iron side-wheel steamer South Carolina, of the New York and Charleston Line, which is having added to it improved wheels.

## Tribute of Respect.

At the regular monthly communication of Strict Observance Lodge, No. 73, A. F. M., held July 1, 1870, the following preamble and resolutions were unanimously adopted:

Since our last monthly communication the unsparing hand of death has again invaded our brotherhood, and has removed from amongst us, in the spring-time of life, our late friend and brother, FREDERICK RICHARDS, JR.

It is at all times sad to bend over the bier of a departed friend, even when he has fulfilled the measure of existence usually allotted to mankind; but it is doubly distressing to contemplate the sudden death of one who has been cut down in the bloom of manhood, and whose early career gave promise of so much future usefulness.

Whilst fulfilling the sad offices of the dead, we are impressed with the necessity of performing the works of the living. Let the grief of the hour admonish us to strive ever to maintain the principles of virtue, which hand in hand with him we have so often heard inculcated in this Temple, so that we, too, may be prepared, as we trust he was, to appear before the Grand Master of the universe, to render our account of our earthly labors.

In testimony of our sorrow on this occasion, be it

Resolved, That in the death of our late brother, FREDERICK RICHARDS, JR., the community has lost a promising citizen, and Strict Observance Lodge mourns a beloved brother and a useful and esteemed member.

Resolved, That we tender to the family of our deceased brother our heartfelt sympathy in their bereavement.

Resolved, That a blank page in our Minute Book be inserted to his memory, and that a copy of this preamble and these resolutions be transmitted to his family by the secretary, and published in the daily papers.

W. W. SIMONS, Secretary.

**THE BLOOD IN SUMMER.**—THE blood deteriorates in hot weather. Profuse perspiration deprives it of a portion of its nourishing and recuperative properties. Consequently it sours, the flesh loses, in some degree, its firmness, the muscles lack their usual elasticity and vigor, and the weight of the body diminishes. These are clear indications that the ordinary supply of the life-sustaining principle afforded by the food we eat is not sufficient to meet the requirements of the system under a high temperature.

There is another reason for this besides the direct influence of the heat, viz: the loss of appetite and the weakening of the digestive powers which it occasions. Under these circumstances, a wholesome invigorant is evidently needed, and the best and safest is HOPPE'S STOMACH BITTERS. This admirable vegetable tonic and alterative acts favorably upon the system in several ways. It increases the appetite and facilitates digestion, thereby inclining the stomach to receive and enable it to assimilate a due amount of nourishment. It also tones the relaxed secretory organs and the bowels. Under its operation the process of emaciation, occasioned by the drain through the pores is arrested, the whole frame refreshed and invigorated, and the spirits exhilarated. The dyspeptic, the bilious, the nervous, the debilitated, scarcely need to be told that it is precisely the stimulant and corrective they ought to take at this season. Thousands of them know the fact by experience. Nothing in the pharmacopoeia out of it will supply its place—least of all the trashy looie nostrums which some unscrupulous dealers would be glad, for the benefit of their own pockets, to peddle out in its stead. ju19-lmth

**Health and Recreation.**

**WILLIAMSTON SPRINGS.**

The large and commodious Hotel at this delightful watering-place has been thoroughly repaired, and fitted up with new furniture, under the superintendence of JOHN A. MAYES, and will be opened on the 20th July, for the accommodation of visitors. No pains or expense will be spared in providing for the comfort and enjoyment of guests. With the advantage of a superior Hotel in the State, and beautiful country, added to the curative properties of the water, and the pleasantness of this delightful village, we believe that the invalid or pleasure-seeker can find no place of the kind elsewhere where the time will be spent more profitably or agreeably.

The rooms are large, airy, and are so arranged as to furnish many conveniences, especially to families who do not wish to be separated.

The table will be always furnished with the best of the country and cities can afford, and in their culinary department, they would say that they have secured the services of a chef who cannot fail to please even the most fastidious.
